***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding dependent claim 23, Applicant is claiming in line 1, "a method as recited in claim 21", whereas claim 21 cites "a computer readable medium," therefore, Applicant is claiming a method and a computer readable medium simultaneously, which is indefinite under 112/2d (In Ex Parte Lyell 17 USPQ2d 1548 (Bd. PA & I 1990)).

3. Claims 1-22 and 25-39 are allowed over prior art.

4. The following is a statement of reasons for the indication of allowable subject matter: Although the combined prior art discloses conserving energy in a ad-hoc mobile environment that includes the utilization of network control management of connections to an ad-hoc wireless network and beacons (neighbor discovery) for creating communication links, they fail to teach or suggest each node making a respective decision about an optimal transmission power to communicate with at least one subset of the neighboring nodes with the respective decision being based on the incoming signals and independent of positional characteristics.
